MEDICAL CHEMISTRY

Book for the medical faculty students

Lviv
Publisher Marchenko T. V.
2023

УДК 54(075.8)
M42

*Approved at a meeting of the Central Methodological Council of ZSMU
and recommended for use in the educational process
(Protocol of the meeting № 3, October 26, 2021)*

Authors:

professor: A. G. Kaplaushenko,
associate professors: A. I. Avramenko, B. O. Varinsky,
senior lecturer: Yu. G. Sameliuk
assistant: Yu. S. Frolova

Reviewers:

L. O. Omelyanchyk – Professor, Department of Chemistry, Zaporizhzhya National University, DSc (Pharmacy), Professor.

M. K. Bratenko – Head of the Department of Medical and Pharmaceutical Chemistry, Bukovyna State Medical University, DSc (Chemistry), Professor.

Medical chemistry : a book for medical faculty students / A. G. Kaplaushenko, A. M42 I. Avramenko, B. A. Varinsky [et al.]. – Lviv : Publisher Marchenko T. V., 2023. – 256 p.

ISBN 978-617-7937-49-3

The book is prepared in accordance with the program of medical chemistry for conducting classes with students of medical faculties, specialties 222 “Medicine”, 221 “Dentistry”, 224 “Technologies of medical diagnostics and treatment”. The book is based on general themes in medical chemistry. It is recommended for use in the discipline of “Medicinal Chemistry”.

CONTENT

PREFACE	8
THEME 1 SOLUTIONS. COLLEGATIVE PROPERTIES OF SOLUTIONS	9
MEDICAL-BIOLOGICAL SIGNIFICANCE OF THE THEME	9
THEORETICAL MATERIAL	9
Solutions and their classifications.....	9
Physical and chemical theory of solutions; thermal phenomena during dissolution	10
Solubility and its dependence on the nature of substances.....	11
Solubility dependence on the nature of the solute and solvent.....	12
The effect of temperature on the solubility of gases, solids and liquids.....	13
The effect of pressure on the solubility of gases, solids and liquids.....	13
Concentration of solutions	13
Electrolytic dissociation.....	14
Hydrolysis of salts	18
Colligative properties of solutions.....	20
Osmosis	22
Osmotic pressure of the solution	22
Oncotic pressure. Hemolysis and plasmolysis.....	23
Cryometry, ebulliometry and osmometry; their use in medical and biological research	24
QUESTIONS AND TASKS FOR SELF-CONTROL	24
THEME 2. ACID-BASIC EQUILIBRIUM. BUFFER SYSTEMS	25
MEDICAL AND BIOLOGICAL SIGNIFICANCE OF THE THEME	25
THEORETICAL MATERIAL	26
Theory of weak electrolyte solutions.....	27
Theory of strong electrolytes' solutions	28
Classification of acids and bases.....	30
Electrolytic theory	30
Electronic theory.....	30
Protolytic theory	30
Theories of R. Pearson and M. Usanovich	31
Ionic product of water.....	32
Hydrogen index	32
Calculation of pH of solutions of strong and weak electrolytes.....	33
The role of hydrogen ions in biological processes	33
Determination of hydrogen index.....	34
Buffer solutions.....	35

Classification of buffer solutions	35
Calculation of pH of buffer systems	35
Mechanism of buffer systems action	37
Buffer capacity	37
Buffer systems of the body	39
Application of knowledge on the theme in medical practice	43
QUESTIONS AND TASKS FOR SELF-CONTROL	44

THEME 3. ELECTROCHEMISTRY THEORY45

THEORETICAL MATERIAL	45
Electroconductivity of electrolyte solutions	45
Electric mobility of ions in a solution	45
Specific electrical conductivity	47
Equivalent electrical conductivity of solutions	50
Conductometric analysis method	51
Conductometric titration of electrolyte solutions	52
Electroconductivity of cells and tissues of the body in norm and pathology. The use of conductometry in medicine	53
Electrode potentials and electromotive force	55
Galvanic elements	57
Nernst equation	58
Classification of electrodes	61
Electrochemical methods of analysis	67
QUESTIONS AND TASKS FOR SELF-CONTROL	78

THEME 4. BIOGENIC ELEMENTS79

MEDICAL AND BIOLOGICAL SIGNIFICANCE OF THE THEME	79
THEORETICAL MATERIAL	80
Classification of nutrients	80
Classification of nutrients according to Vernadsky	82
Biological role of some s-elements	83
Sodium	84
Potassium	85
Magnesium	86
Calcium	87
Strontium	88
Barium	89
Aluminum	91
Boron	93
Silicon	94
Sulfur	95

Selenium	96
Fluorine.....	97
Chlorine	98
Iodine	99
Copper.....	101
Zinc.....	102
Iron.....	105
Cobalt.....	105
QUESTIONS AND TASKS FOR SELF-CONTROL	106
THEME 5. COORDINATION COMPLEX	107
MEDICAL AND BIOLOGICAL RELEVANCE	107
THEORETICAL MATERIAL.....	107
The origins of complexes and their study methods	108
Werner's coordination theory	110
Concept of complex compound.....	111
Complexing agent.....	112
Ligands	113
Ligand dentate	113
Coordinate number	114
The internal and external spheres of the complex compound	115
Multi-core complexes	116
Types of complex compounds	117
Complex compounds stability in a solution.....	126
The importance of complex compounds for chemistry	132
The biological role and use in medicine	133
QUESTIONS AND TASKS FOR SELF CONTROL	135
THEME 6. CHEMICAL THERMODYNAMICS AND BIOENERGY	136
MEDICAL AND BIOLOGICAL SIGNIFICANCE OF THE THEME	136
THEORETICAL MATERIAL.....	137
Basic concepts of thermodynamics	137
Work in thermodynamic processes.	139
Zero law of thermodynamics.....	139
The first law of thermodynamics	139
Thermochemistry.....	140
Laws of thermochemistry. Consequence of Hess's law.....	141
The second law of thermodynamics	144
Entropy	144
The third law of thermodynamics.....	147

Thermodynamic potentials. Criteria for equilibrium and direction of processes in a closed system	148
Dependence of the equilibrium constant on temperature.	
The principle of Le Chatelier.....	153
Thermodynamics of open systems.....	154
Bioenergy.....	155
QUESTIONS AND TASKS FOR SELF-CONTROL	158

THEME 7. CHEMICAL KINETICS161**MEDICAL AND BIOLOGICAL SIGNIFICANCE OF THE THEME**161**THEORETICAL MATERIAL**162

The rate of a chemical reaction.....	164
Factors affecting the rate of a chemical reaction	165
The rate constant of a chemical reaction	166
Molecularity of elementary reactions	167
The order of reactions	167
Methods for determining the order of the reaction.....	170
Dependence of reaction rate on temperature. Vant-Goff coefficients.	
Arrhenius equation.....	171
Catalysis. Enzymatic catalysis.....	174
Photochemical reactions	175
Chemical equilibrium. Reversible and irreversible chemical reactions	176
Le Chatelier principle	177
QUESTIONS AND TASKS FOR SELF-CONTROL	178

THEME 8. PHYSICO-CHEMISTRY OF SURFACE PHENOMENA.**FUNDAMENTALS OF ADSORPTION THERAPY**180**MEDICAL AND BIOLOGICAL SIGNIFICANCE OF THE THEME**180**THEORETICAL MATERIAL**180

Superficial phenomena. Basic concepts.....	180
Structure and classes of surfactants	184
Adsorption	186
Adsorption at the liquid-gas interface. Gibbs equation.	186
Orientation of PAR molecules in the surface layer.	
The structure of biological membranes	189
Monomolecular theory of adsorption. Langmuir's equation.....	192
Adsorption at the interface between solid and gas	194
Adsorption at the interface solid – solution.....	195
Adsorption of non-electrolytes and weak electrolytes.....	195
Adsorption of strong electrolytes.....	196
QUESTIONS AND TASKS FOR SELF-CONTROL	199

THEME 9. PHYSICO-CHEMICAL PROPERTIES OF DISPERSED SYSTEMS	201
MEDICAL AND BIOLOGICAL SIGNIFICANCE OF THE THEME	201
THEORETICAL MATERIAL	201
Signs of objects of colloid chemistry.....	202
Classification of colloid systems	203
Basic methods of obtaining colloid systems and micelle structure	204
Methods of physical condensation.....	205
Methods of chemical condensation	205
Dispersion methods	207
Peptization method	209
Cleaning of sols	209
Molecular-kinetic properties of dispersed systems.....	211
Osmotic properties of colloidal solutions	213
Sedimentation in dispersed systems	214
Features of optical properties of colloidal systems.....	216
Electrokinetic potential.....	221
Electrokinetic properties of dispersed systems.....	221
Stability factors and coagulation of colloidal systems. Colloidal protection	224
Coagulation rate.....	225
Application of knowledge of colloid chemistry in medicine.....	228
QUESTIONS AND TASKS FOR SELF-CONTROL	228
THEME 10. MMC SOLUTIONS	231
MEDICAL AND BIOLOGICAL SIGNIFICANCE OF THE THEME	231
THEORETICAL MATERIAL	232
The modern idea of the MMC solutions.....	232
Classification of the MMC solutions	232
Swelling of the MMC	234
Properties of MMC solutions.....	237
Rheological properties of MMC solutions	238
Optical properties of MMC solutions	239
Molecular – kinetic properties of MMC solutions	239
Polyelectrolytes.....	240
Organic synthetic MMC	247
Phase and physical states of polymers.....	247
Processes occurring in Navy solutions under the influence of external factors ...	248
Determination of polymers' molecular weight	252
QUESTIONS AND TASKS FOR SELF-CONTROL	253
Main literature.....	254
Additional literature	254

Медична хімія

Підручник для студентів медичних факультів

Підп. до друку 27.10.2021 р.
Формат 70×100/16. Папір друк. № 2. Гарнітура Times New Roman.
Ум. друк. арк. 20,8. Тираж 300 прим.

Свідоцтво про внесення суб'єкта видавничої справи
до Державного реєстру видавців, виготовлювачів і розповсюджувачів видавничої продукції:
серія ДК № 6784 від 30.05.2019 року,
видане Державним комітетом телебачення і радіомовлення України

Надруковано у друкарні видавця Марченко Т. В.

Підручник складено відповідно до програми з медичної хімії для проведення занять зі студентами медичних факультетів спеціальностей 222 «Медицина», 221 «Стоматологія», 224 «Технології медичної діагностики та лікування». Підручник побудовано, виходячи із загальних тем медичної хімії. Рекомендовано для використання при вивченні дисципліни «Медична хімія».
